

For Worldwide Release: June 28, 2021

Perkins Engines distributor Clarke Powered Solutions awarded additional territory

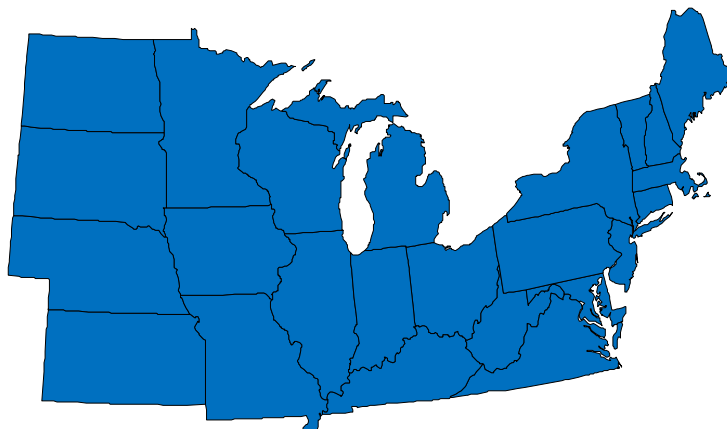

Perkins Engines distributor Clarke Powered Solutions (“Clarke”) has been awarded additional states—Kentucky and Virginia—to their customer service area that now covers 26 states across the Midwest and Eastern regions of the United States.

The addition of the states to Clarke’s territory is part of an overall Perkins distributor plan to further strengthen the Perkins North American service network by providing engine expertise and services for Perkins powered machine owners and operators for more than half the nation.

“Since Clarke joined Perkins as an authorized distributor, they have proven they are more than committed to their customers’ success by providing the utmost service and support across their entire territory,” said Jaz Gill, Vice President of global sales, marketing, service and parts at Perkins. “The entire team’s attention to detail and positive relationship with their customers has not only helped grow their business, but it was also an important factor when deciding to award additional territory to their service area.”

Clarke’s President and CEO, Kirk Andreae stated, “We are excited to be adding two additional states to our Perkins territory. We aim to provide best-in-class services and support to our customers, both new and current, through our eight locations in Kentucky and Virginia. We will use our experience and resources to make sure we are taking on the needs of our customers head-on and helping to create an even better service network. Clarke has served customers in this industry for more than 55 years and we are proud to continue growing our partnership with Perkins.”

Based in Cincinnati, OH, since 1964, Clarke offers sales, engineering, support, parts, and service to those in the Midwest and Eastern U.S. regions including:

- North Dakota
- South Dakota
- Nebraska
- Kansas
- Minnesota
- Iowa
- Missouri
- Wisconsin
- Illinois
- Michigan
- Indiana
- Kentucky
- Ohio
- West Virginia
- Virginia
- New York
- New Jersey
- Pennsylvania
- Maryland
- Vermont
- New Hampshire
- Massachusetts
- Connecticut
- Rhode Island

-END-

Note to Editors: A world-leading supplier of off-highway diesel engines in the 4-2000 kW (5-2800 hp) market, Perkins has more than 85 years' experience of designing, building and servicing industrial power solutions. By working in collaboration with over 800 original equipment manufacturers in the agricultural, construction, electric power generation, industrial and materials handling markets, we tailor our engines to meet their needs and exacting standards. With eight state-of-the-art manufacturing facilities, we ensure all our engines meet the same quality standards in every location. Supported by a global distribution network and digital aftermarket solutions, we work to deliver power and service to serve our customers. With more than 21 million engines manufactured powering over 5,000 different applications across the world, our engines truly are the heart of every great machine.
